Care-H

Bottle of 100 ml

Oil-based lotion rich in herbal active ingredients for the efficient treatment of hemorrhoids.

About hemorrhoids:

A rather frequent pathology for the adults, there are two kinds of hemorrhoids, external and internal. Hemorrhoids are mainly varicose veins located around the anus and causing inflammations. Among their causes we find hereditary factors, constipation, spicy diet and high blood pressure. The pain can be limited to a feeling of uneasiness; however it can be violent and intolerable in the case of a strangulation of hemorrhoids prolapses.

Action of Cure-H:

Cure-H acts by using an oily base added with plants and specific natural substances, which penetrate the skin to venous fabric. The astringent and healing properties of the lotion resorb the inflammations and provide more tonicity, strength and resilience to the venous tissue.

Cure-H has a soothing effect from the very first application; however the treatment must be carried until the hemorrhoids have totally disappeared.

Instructions:

Pour two drops on the finger and apply on the affected areas by rubbing gently. If the pain is internal, it is necessary to reach the sensitive area to apply the lotion. Apply the lotion two to three times per day.

Composition:

Olea Europaea Fruit Oil, Anthemis Nobilis Flower Oil, Boswellia Serrata Gum Extract.
