Powerful tonic, it is beneficial for the Blood, the Nervous System, Erectile Functions, Lungs, Digestion and in cases of Cancerous Tumors.

Properties:

- Antioxidants -allergic
- Anti-inflammatory
- Pro-immune

Also in preventive use

A little history

Ginseng, a “Root of Life” used for centuries.

Introduced to Europe in the 16th century, Ginseng (jensheng / man-life) takes its name from the shape of its root, the only part used therapeutically.

Indeed, it is similar to a human form: the swollen part of the plant constituting the head and the trunk; the ramifications representing the arms and lower limbs.

Ginseng is also called Panax Ginseng because of its many therapeutic effects. Indeed Panax comes from the Greek Panacos which means “remedy that cures everything”. This is where the word panacea comes from.

Among the other popular names for Ginseng, we also find the name “Root of life” or “Root of Heaven”.

BENEFITS OF GINSENG

In Chinese medicine, it is renowned as one of the best tonics for IQ, the source of vital energy. Doctors attribute to it the property of increasing the strength and volume of the Blood, hence the confirmed reputation of Ginseng in the case of erectile dysfunction.

Korean Ginseng is most famous for its high levels of saponins and ginsenosides. For good therapeutic effects, the roots must be at least 6 years old.

There are two types of Ginseng preparation. One is simply to dry the roots of Ginseng, we then speak of White Ginseng. Red Ginseng involves a much longer manufacturing process but which guarantees a better final concentration and better conservation of the active ingredients, as well as their better bioavailability.

Powerful tonic, it is beneficial for the Blood, the Nervous System, Erectile Functions, Lungs, Digestion and in cases of Cancerous Tumors.

Blood

Heats the blood and sets it in motion

The nervous system

Improves mental state and nerve functions
